# COLLECTION LEAVES

The designer Caroline Bourles has taken this fascinating material recycled leather (ricuoio®) to create a truly refined product. The colour is enhanced by the screen printing, while the hot engraving intensifies the already warm and rough-textured feel of the surface. Books with elegant bodonian binding have a pleasantly fresh, natural feel to them.

# COLLECTION KROMA

"Colours are the universal language of the soul" wrote Wassili Kandisky. Every notebook is like a conversation between complementary shades: involving the colours of the cover, of the print content, and of the straw-paper insert between the two ruled sections.

A special feature is the double-faced cover, showing the name of the colour in both Italian and English.

**Small copy-books measuring 12x17 cm  
also form part of this collection**

# COLLECTION "QUADERNI APERTI"

2016  
NEWS

*Do you remember when you were a child?*

Arbos presents the first four editions of a line of copy-books which contain an insert of texts and drawings from school copy-books of the past; they each cover a single decade and date from the late 19th century to the present day. These are copy-books to write in and to collect, which take us back in time and show us how children - in their simple, direct way - have always sought to describe the world in which they live.
